

CRAWLER EXCAVATOR

The HX220AL Crawler Excavator is part of Hyundai's brand new A-series: a fresh generation of construction equipment that complies with the European stage V emission levels. But it does much more than that! While fulfilling regulatory demands, Hyundai aimed for a ground-breaking level of customer satisfaction with maximum performance and productivity, better safety, more convenience and improved uptime management.

From its robust exterior design to its smart performance-enhancing technologies, the HX220AL opens up a world of new possibilities where tiny efforts move mountains. It's time to experience the Hyundai Effect!

READY TO CHANGE YOUR WORLD

ENTER A WORLD WHERE ANYTHING IS POSSIBLE

Productivity

- Short cycle times
- Mono or two-piece boom
- Leading controllability with Electronic Pump Flow Control (EPFC)
- Customisable hydraulic attachment lines
- Attachment flow control (20 tools programmable)
- · Fine swing control (option)
- · Boom floating system (option)

Durability/Safety

- · Excellent visibility
- AAVM camera system (option)
- · LED lights (option)
- Reinforced upper and lower structure
- High-grade hoses
- · Reinforced pins, bushings and polymer shims
- Swing lock (option)

Comfort

- Spacious cabin
- 8" touchscreen monitor
- Automatic climate control
- Smart key and start/stop button
- Air suspension seat with heater (option)
- Viscous cabin suspension mounts
- Ergonomic joystick design

Serviceability

- Excellent accessibility
- Electric Fuel Filter Pump with Automatic Stop Function
- Centralised greasing (option)
- Hi Mate telematic system
- · Extended service intervals

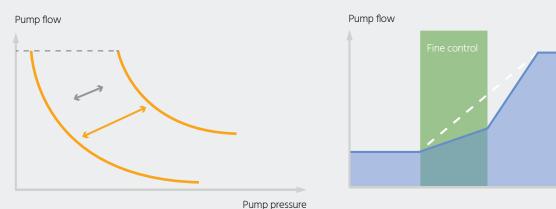

POWERFUL AND FUEL-EFFICIENT TO BOOST PRODUCTIVITY

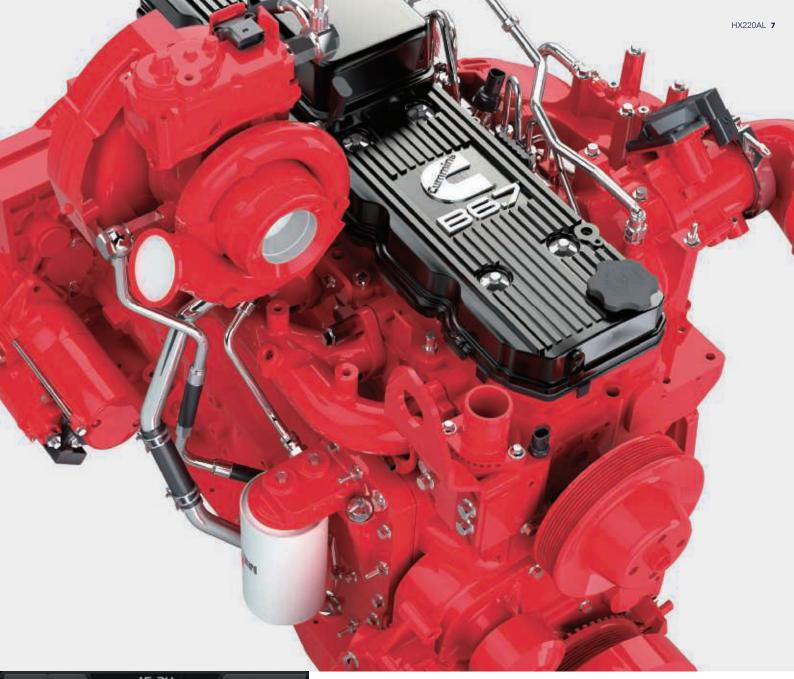

The HX220AL is powered by a robust Stage Vcertified Cummins engine with an innovative integrated after-treatment system that reduces both emissions and maintenance requirements. It delivers all the power you need to handle demanding jobs, along with fast levelling and truck loading times and excellent fuel economy. A range of smart technologies are included for precise management of the engine output and pump flow rate. A new EPFC (Electronic Pump Flow Control) system improves controllability and reduces operating costs. Additional control and monitoring features help you to further improve productivity every single day.

EPFC (Electronic Pump Flow Control) improves the controllability of attachments, enabling faster, more precise work with optimised fine control. It also reduces fuel consumption by optimising pump output control for each operation.

Lever pilot pressure

IENU	se	2016.12.12 15:24 D°C	6
IENU	42	HYUNDAI	e
-	l Comb	ination Speed Setting	initialization
	Load Sens	sitivity	Level 1
	Trucking b	balance	Level 1
	Boom/Arr	m Balance	Level 1
	Arm Spee	d	Enable

The combination speed setting system allows operators to balance load sensitivity and boom priority against arm and swing. Select from five levels of load sensitivity to adjust initial flow rate for boom-up and arm-in operation according to attachment weight. Ten levels of boom priority can be selected to balance boom operation against arm and swing.

Like all A-Series machines, the HX220AL features our all-in-one exhaust aftertreatment system which cuts emissions and operating costs while enhancing reliability and simplifying maintenance.

"The control technologies are well thought-out and save me time and money on every job."

Easy-to-use 3D Machine Guidance gives precise feedback on the bucket position as well as 3D grading assistance and jobsite mapping in real time. This reduces manpower requirements on site and enhances operator performance. The system includes an optional Hyundai Ready automatic surveying system for excavators which provides work guides to further improve work speed and productivity.

A CABIN DESIGNED AROUND YOU

The HX220AL cabin was designed as a comfortable working environment that enhances productivity and reduces fatigue for every operator. Pleasant and spacious, it features a high-quality, adjustable seat and comfortable reach to all controls. A range of technologies enable easier machine monitoring, while the audio system includes radio, USB and AUX input to keep you entertained during your working day. The overall design places you right at the centre of the Hyundai Effect, with a world of convenience and control at your fingertips.

"I can check the machine status anytime I want and adapt my performance for better, faster results. It's almost as if the machine has become an extension of me."

•

The accelerator, remote air conditioner controller and instrument cluster can be operated using the convenient jog shuttle-type **haptic controller**.

The **instrument panel** is optimised to provide quick, easy access to machine status information as you work. It features an 8-inch **touchscreen monitor** for excellent legibility.

The **Eco Report** feature helps you to develop efficient working habits by displaying real-time information about machine performance.

4

Menu functions can be set by the machine owner, who can also provide or restrict access for machine users by using a password to lock or unlock the list of machine parameters.

The HX220AL has a luxurious **air suspension** seat with heating as standard. The **ergonomic** joysticks make operation comfortable and intuitive.

 The heating and air conditioning system efficiently regulates and directs airflow in the cabin.

The Miracast system based on the operator's smartphone Wi-Fi allows the use of various smartphone features on the screen, including navigation, web surfing and music and video playback.

SUPPORTING A SAFER WORKPLACE

Small details can make a huge difference when it comes to safety and security. The HX220AL offers all-round protection for you, your workmates and your equipment. Its cabin and engine hood feature a new design that allows maximum visibility, while Advanced Around View Monitoring (AAVM) gives you a clear overview of your surroundings. By helping to ensure an accident-free worksite, the HX220AL contributes to the peace of mind and productivity that form part of the Hyundai Effect.

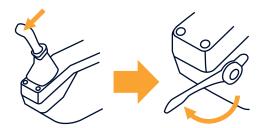

The **Advanced Around View Monitoring** (AAVM) camera system gives you a 360° overview of your immediate working environment. It also includes Intelligent Moving Object Detection (IMOD) technology that senses and warns you when people or objects come within five metres of the machine.

The **open design of the cabin side door** gives the operator a clear, unimpeded view to the exterior. The **door handle** design has also been redesigned for more convenient access.

"I can always see what's going on around me, even when weather conditions are poor or the machine is moving."

The **auto safety lock** feature prevents unintentional ignition. While the auto safety lock is activated, the excavator is not controlled by the RCV lever.

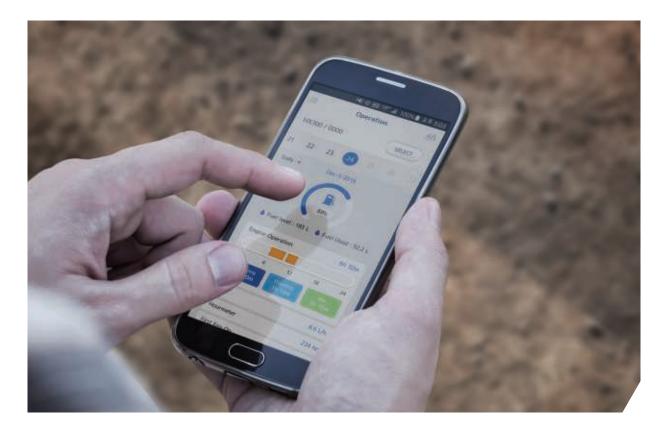

ADVANCED DIAGNOSTICS AND SERVICING SUPPORT

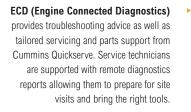

The peace of mind that comes with quick, low-effort servicing is also part of the Hyundai Effect. The HX220AL is designed to make maintenance as convenient as possible. All components and materials have been optimised to ensure a long, trouble-free life. Hyundai's Hi Mate remote management system uses mobile data technology to provide the highest level of service and support. The HX220AL also features our new Engine Connected Diagnostics (ECD) system which immediately reports any engine failure to both Hi Mate and the engine manufacturer to ensure the fastest, easiest resolution.

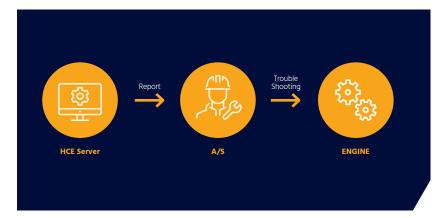

НіМ∕ІТЕ

For maximum convenience and security, the HX220AL features Hyundai's exclusive Hi Mate remote fleet management system, which uses mobile data technology to provide the highest level of service and support. You can monitor your machines from any location via a dedicated website or mobile app, with access to working parameters like total engine hours, machine utilisation, actual performed working hours, fuel consumption and machine location. The system makes it easy to evaluate machine productivity, plan servicing and maintenance tasks, as well as any required cost saving measures. It also offers geofencing to protect your machines against theft and unauthorised usage.

READY FOR ACTION AND BUILT TO LAST

You need to know that the investment you make today will help to sustain your business over the long term. That's why we prioritised reliability throughout the development of the HX220AL, from design and manufacturing to quality control. We improved engine reliability by removing the EGR and integrating exhaust after treatment with a simplified, single-module system that's easier to maintain. The upper and lower frame structures are reinforced for high load work, while the attachments have been rigorously tested for the roughest conditions. The overall aim is to minimise downtime and repairs so that you can stay on schedule, avoid unexpected costs and protect your profits.

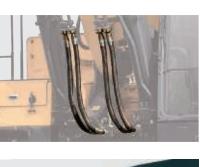

The engine and **exhaust after-treatment** system are integrated for simplified control and maintenance.

 High-grade hoses with outstanding resistance to heat and pressure provide maximum durability, even in rough working conditions.

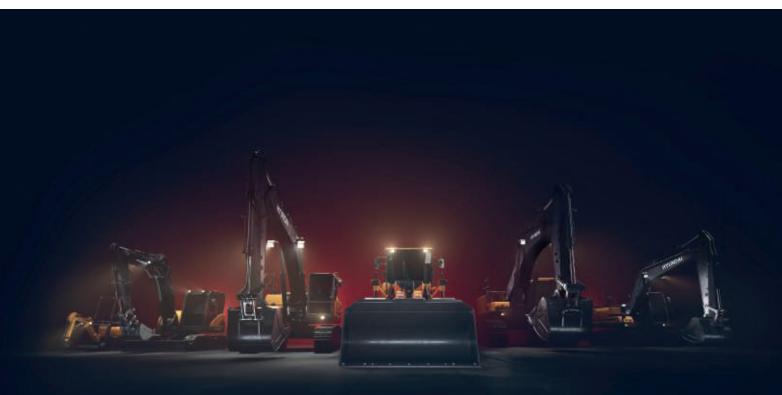

The reinforced **pins, bushings and polymer shims** are designed for an extended lifetime.

FOCUSED TECHNOLOGIES FOR THE RESULTS YOU WANT

Hyundai's A-series crawler excavators are designed to create better conditions for operators and deliver the ultimate ownership experience. Every detail is carefully fine-tuned to match your needs in the field, including better safety and comfort, higher productivity, maximum uptime and easy servicing. It's all part of the Hyundai Effect.

SPECIFICATIONS

ENGINE	
Maker / Model	Cummins B6.7 / STAGE V
Туре	Turbocharged, charge air cooled, diesel engine
Gross power (SAE J1995)	173 HP (129 kW) at 2,200 rpm
Net power (SAE J1349)	170 HP (127 kW) at 2,200 rpm
Max. Power	195 HP (145kW) at 2,000 rpm
Peak torque	881 N m (650 lb ft) at 1,300 rpm
Displacement	6,700 cc (408 cu in)

HYDRAULIC SYSTEM

MAIN PUMP				
Туре	Variable displacement tandem axis piston pumps			
Max. Flow	2 × 222 l/min			
Sub-pump for pilot circuit	Gear pump			
Cross-sensing and fuel saving pump	system			
HYDRAULIC MOTORS				
Travel	Two speed axial pistons motor with brake valve and parking brake			
Swing	Axial piston motor with automatic brake			
RELIEF VALVE SETTING				
Implement circuits	350 kgf/cm² (4,980 psi)			
Travel	350 kgf/cm² (4,980 psi)			
Power Boost (boom, arm, bucket)	380 kgf/cm² (5,400 psi)			
Swing circuit	265 kgf/cm² (3,770 psi)			
Pilot circuit	40 kgf/cm ² (570 psi)			
Service valve	Installed			
HYDRAULIC CYLINDERS				
	Boom: Ø 120 × 1,290 mm			
No. of cylinder bore X stroke	Arm: Ø 140 × 1,510 mm			
	Bucket: Ø 120 × 1,055 mm			
* Hyundai Bio Hydraulic Oil (HBHO)	available			

* Hyundai Bio Hydraulic Oil (HBHO) available

DRIVING AND BRAKING

Drive method	Fully hydrostatic type
Driving Motor	Axial piston motor, in-shoe design
Deceleration System	Planetary reduction gear
Max. Drawbar Pull	20,800 kgf (45,860 lbf)
Max. travel speed (high / low)	5.4 km/hr (3.4 mph) / 3.5 km/hr (2.2 mph)
Gradeability	35° (70%)
Parking brake	Multi wet disc

CONTROL

Pilot pressure operated joysticks and pedals with detachable lever provide almost effortless and fatigueless operation.			
Pilot control Two joysticks with one safety lever (LH): Swing and arm, Boom and bucket			
Traveling and steering	Two levers with pedals		
Engine throttle	Electric, Dial type		

SWING SYSTEM

Swing motor	Fixed displacement axial piston motor
Swing reduction	Planetary gear reduction
Swing bearing lubrication	Grease-bathed
Swing brake	Multi wet disc
Swing speed	11.4 rpm

CAPACITIES

	liter	US gal	UK gal	
Fuel tank	400	106	88	
Engine coolant	40	10.6	8.8	
Engine oil	23.1	6.1	5.1	
Swing device	6.2	1.64	1.36	
Final Drive (each)	4.5	1.2	1	
Hydraulic system (including tank)	275	72.6	60.5	
Hydraulic tank	155	40.9	34.1	
DEF/AdBlue [®]	48	12.6	10.5	

UNDERCARRIAGE

The X-leg type center frame is integrally welded with reinforced box-section track frames. The undercarriage includes lubricated rollers, idlers, track adjusters with shock absorbing springs and sprockets, and a track chain with double or triple grouser shoes.				
Center frame	X - leg type			
Track frame Pentagonal box type				
No. of shoes on each side 49 EA				
No. of carrier roller on each side 2 EA				
No. of track roller on each side 9 EA				
No. of rail guard on each side 2 EA				

OPERATING WEIGHT (APPROXIMATE)

Operating weight, including 5.680 mm (18' 8") boom, 2,920 mm (9' 7") arm, SAE heaped 0.92 m3 (1.20 yd3) bucket, lubricant, coolant, full fuel tank, full hydraulic tank, and all standard equipments.

OPERATING WEIGHT

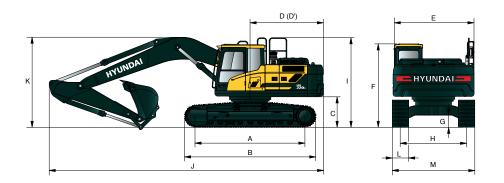

Shoes			Operating weight	Ground pressure

1. Lifting capacity is based on ISO 10567.

 Lifting capacity of the HX A Series does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity. The Lift-point is bucket pivot mounting pin on the arm (without bucket mass).
 (*) indicates load limited by hydraulic capacity.

1. Lifting capacity is based on ISO 10567.

 Lifting capacity of the HX A Series does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity. 3. The Lift-point is bucket pivot mounting pin on the arm (without bucket mass).

4. (*) indicates load limited by hydraulic capacity.

Lifting capacity is based on ISO 10567.
 Lifting capacity of the HX A Series does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity.

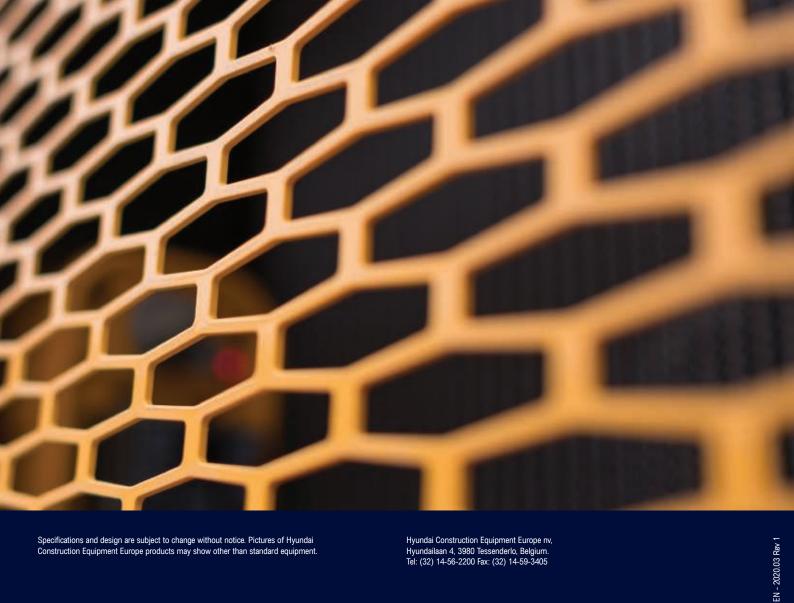

The Lift-point is bucket pivot mounting pin on the arm (without bucket mass).
 (*) indicates load limited by hydraulic capacity.
